You have **one quest.** We make it count.

Wonder Games is a dedicated division focused exclusively on the gaming industry. We specialize in designing captivating games and creating immersive websites tailored to the world of gaming.

As part of Wonder Makers, a digital product studio driven by excitement, our mission is to create unique digital experiences that get you far beyond what you came for.

Prague

Websites Animation 3D Game UX/UI Web3

You don't need a cheat code. You need a team eager to take the initiative and not just create but defend your game. That's where we come in.

Tools: Figma, Photoshop, Illustrator, After Effects, Rive, Cinema 4D, Blender, Midjourney

Pricing

We keep it real with you.
That includes the numbers.

Our pricing is transparent and flexible, based on project complexity.

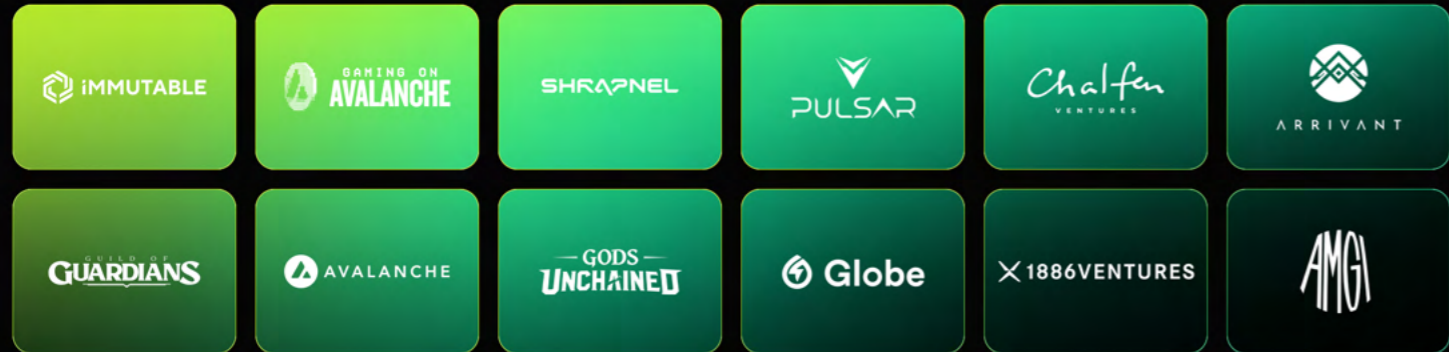

For clear-cut projects with a defined scope, we can provide you with a fixed price cap. For more dynamic projects that require versatility, we charge hourly rates based on the estimated number of hours required.

This approach allows us to work collaboratively with you to create a product that meets your expectations, and then some.

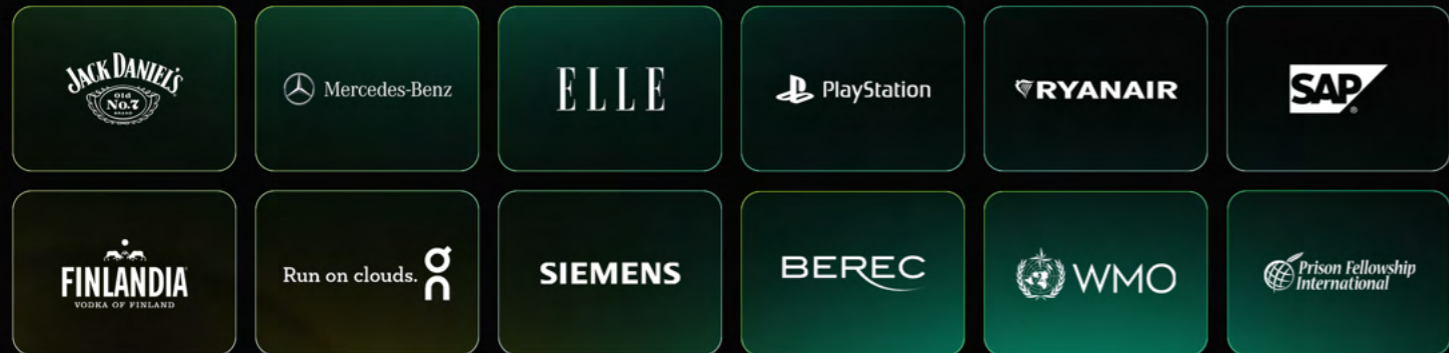

The hourly rate varies depending on team seniority, composition, and contract length.

Avalanche

Website

UX / UI

Frontend

Backend

Astro

React

Contentful

SSG

Client

Avalanche is a versatile smart contracts platform that enables rapid transaction finalization, providing developers across diverse industries with tools to create customized blockchain solutions for the Web3 ecosystem.

Solution

To create a presentation website with a portfolio of games built on the Avalanche platform, including case studies. Simultaneously, it should introduce the platform and motivate other game developers to engage and build games on the Avalanche platform. The new website is highly visually focused, using assets from individual games in its design. It is cinematic, includes animations, and its general aim is to generate a "wow" effect for users.

Guild of Guardians

Website

Web3

UX / UI

Frontend

Backend

React

Next.js

Node.js

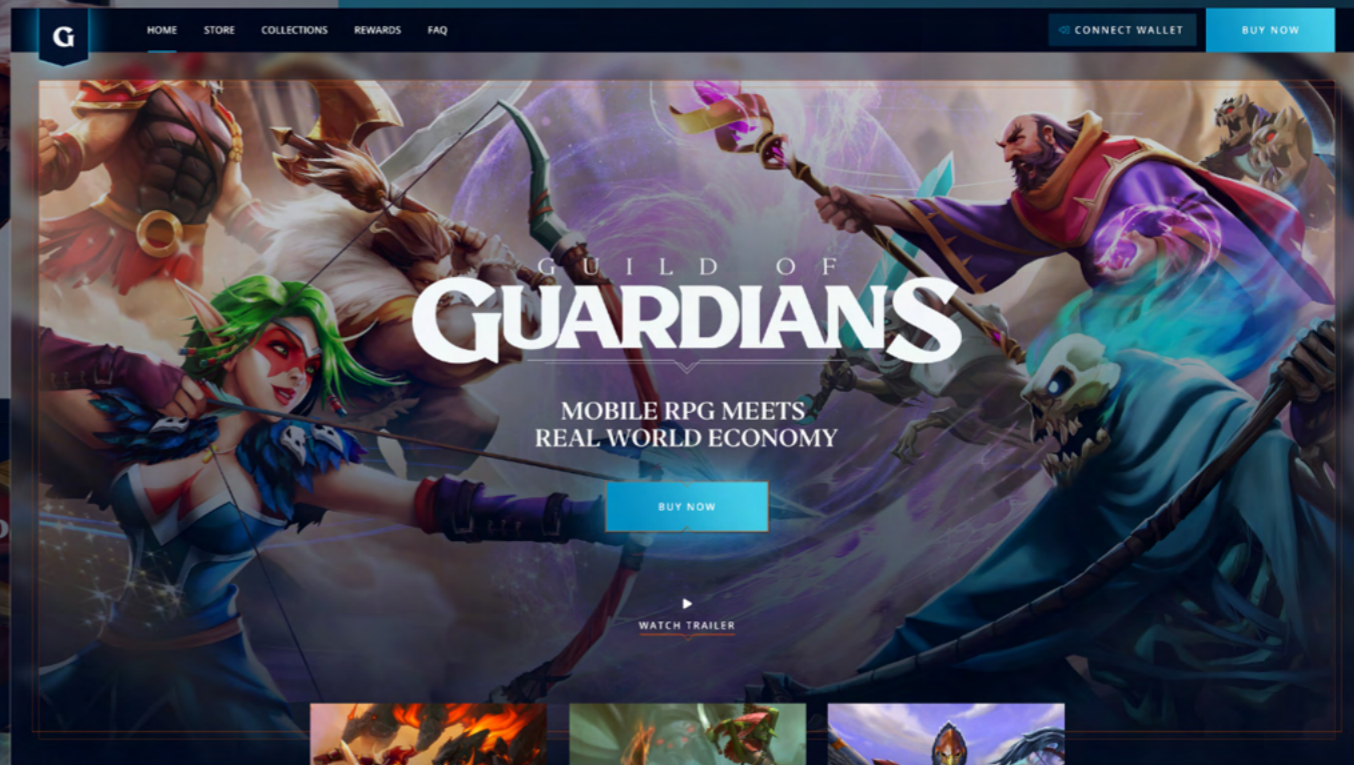

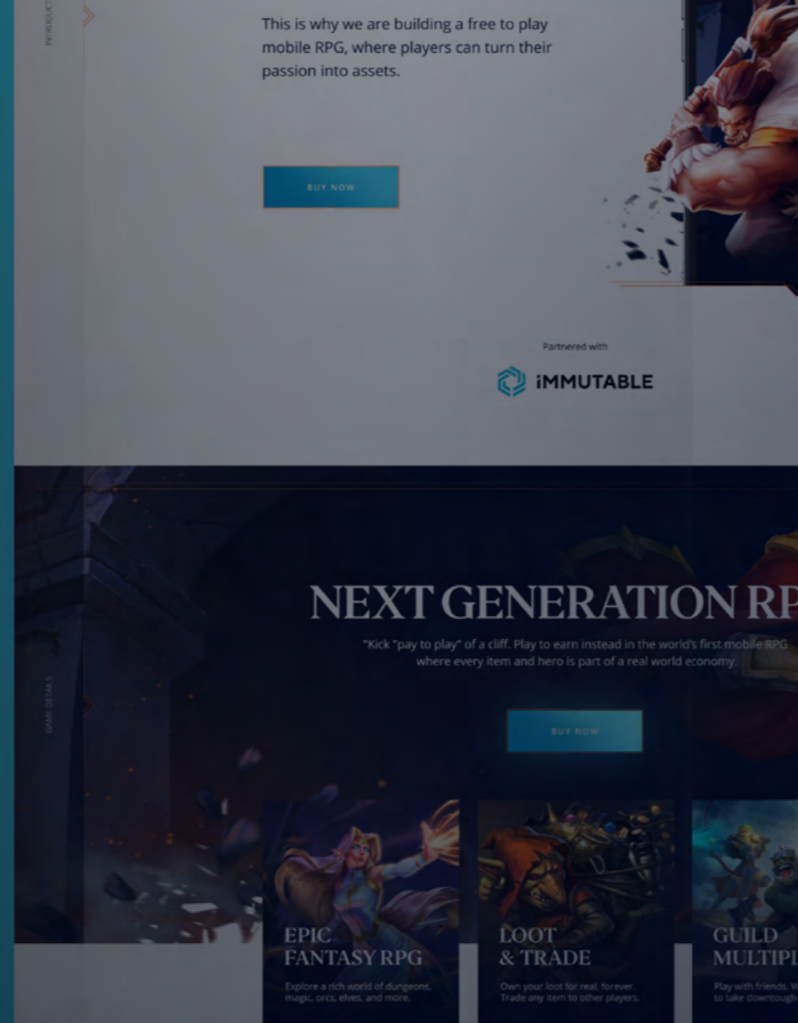

Solidity

Client

Immutable's 'Guild of Guardians' is a free-to-play mobile RPG where players can turn their gaming passions into blockchain assets.

Solution

We designed and developed the game's website, which also serves as the NFT pre-sale platform. Our team continues to work with the client on UI design for the game making Immutable, the fastest Australian company to reach unicorn status and one of the most valuable startups.

- Astro
- React
- Contentful
- Node.js
- SSG
- Pagefind

Client
Avalanche is a versatile smart contracts platform that enables rapid transaction finalization, providing developers across diverse industries with tools to create customized blockchain solutions for the Web3 ecosystem.

Solution
We developed Owl Explains, a website dedicated to educating users about blockchain, cryptocurrencies, and Web3 through articles, podcasts, and quizzes, functioning as a support platform for Avalanche's outreach and education initiatives.

Shrapnel

- Website
- Web3
- UX / UI
- Frontend
- Backend
- SvelteKit
- Strapi
- Node.js
- WalletConnect
- SumSub

Client

Shrapnel is a highly competitive AAA extraction shooter PC game that introduces true ownership and real-world value to players, showcasing skill-based gameplay, creative modding tools, and a community marketplace.

Solution

We developed a website allowing users to purchase Shrap Tokens, involving integration with a blockchain wallet, backend communication, and the implementation of an affiliate program functionality.
